

What Is It?

PC Matic delivers the most comprehensive computer security currently available. Using our proprietary global whitelist technology SuperShield, we are able to reactively and proactively block more threats than any competitor with a solution that is 100% developed and supported in the USA.

PC Matic's whitelist keeps you more secure than other AV security who utilize blacklists and heuristic protection

Simple to install with a cloud scheduler, making it easy to setup with no hassles so you can focus on other things

PC Matic's browser protection blocks intrusive ads, popups, and tech support scams from taking over your browser

Backed by independent lab tests, PC Matic has won the VB100 proactive detection record for two years in a row

How Do We Stand Out?

- ▶ PC Matic offers consumers the ability to take advantage of the best security approach available, normally reserved for businesses with a full IT staff.
- ▶ PC Matic not only provides the best security with our whitelisting approach, it includes patch management, computer maintenance, and traditional anti-malware protection and cleaning.
- ▶ Our dedicated malware research team looks at every unknown sample seen by our customers and returns a classification within 24 hours. Unlike application ratings, which can often perform incorrectly, our whitelist has been curated by our research team.

PC Matic promises that it won't let any program run if it's not on the whitelist, and it delivers on that promise."

- Neil Rubenking, PC Magazine 2017

PC Matic helps keep your computer safe.

Proactive Whitelist Technology: Our whitelist has been tested with 99.99% good file accuracy and consistently blocks more unique and old threats than blacklists and heuristic detection. We already see less false positives than application control solutions, and are continuing to improve our accuracy.

Small Physical Footprint: PC Matic has a small physical footprint, in our tests only 450 MB of storage space is used up on each computer with our software, less than almost all competitors.

Stop Ransomware in its tracks: Ransomware is quickly becoming a global epidemic for businesses that rely on technology. Our proactive whitelist solution is the only solution to completely block ransomware before it can encrypt your data and cost you thousands.

Defeat Tech Support Scammers: PC Matic now protects against the well known tech support scam. Infected websites host a intrusive pop up that will lock down your browser and implore you to call for support to fix a problem that doesn't exist. Our customers can browse the web confidently, knowing PC Matic has their back.

What Our Customer's Have to Say...

“ For years I used multiple products to keep my PC's free of malware, and still became infected. After 3 years of using PC Matic I have been virus and malware free!”

- Robert (Amazon customer)

“ I think I am in my third year using PC Matic, and tried all of the rest over the years and none of them even came close to protecting me like PC Matic does.”

- Bob Dillard (Facebook Review)
